Distributed Computing (COMP3008)
Assignment 1 (Part B) – 8 Marks
Individual report on building a chat application using .NET

An individual report within a group submission typically refers to a portion of a larger project report or assignment that a specific team member contributes. The objective of this report is to identify the contribution of the team members as well as self-reflection towards the learning outcomes. Your report should contain the following attributes:

1. **Introduction**: Introduce yourself and briefly mention your role and responsibilities in the group project. Also, specify the overall contribution of your in terms of percentage. For example, in a typical group of 3 where everyone contributes equally, the individual overall contribution will be 33.33%. [1 Mark]
2. **Methodology and challenges**: Did you only stick to only two projects in the solution? Any separate DLL projects? Describe how these solutions and design choices contributed to the overall success of the project. Mention the sources you have studied and also specify the other coding sources where you are inspired to solve a particular challenge. [4 Mark]
3. Reflection: Describe your reflection on teamwork. What are the challenges in communication? How did you solve it? [3 Mark]
4. **References** (if applicable): Cite any sources, references, or materials you used to complete your tasks.

The maximum mark is placed right after each requirement. It is expected that you produce a professional document, i.e., well-formatted, spell-checked and informative discussion. There is no limit on the maximum number of words. However, it is expected to have at least 750 words or equivalent illustrations.

Submission due date: 24 September 2023 23:59 AWST.

Submission Guidelines:
Submit your assignment in PDF/DOC format electronically, via Turnitin, before the deadline. **It is an individual report, so make sure you don't share it with your group members or others. We don't accept high similarity scores in Turnitin, which may result in academic integrity issues.**

Academic Integrity: This is an assessable task. If you use someone else's work or obtain someone else's assistance to help complete part of the assignment that is intended for you to complete yourself, you will have compromised the assessment. You will not receive marks for any parts of your submission that are not your original work.

Further, if you do not reference any external sources, you are committing plagiarism and collusion, and penalties for Academic Misconduct may apply. Please see Curtin's Academic Integrity website for information on academic misconduct (which includes plagiarism and collusion).

The unit coordinator may require you to provide an oral justification of or to answer questions about any piece of written work submitted in this unit. Your response(s) may be referred to as evidence in an Academic Misconduct inquiry.
